

Sun Life's "Innovations" Microsite

See what's new under the Sun! Benefits Canada is playing host to our microsite that highlights many of the new technologies, tools and resources that we use every day to help make us easier to do business with.

Industry-Leading Innovation from Sun Life

We have exciting information posted about our latest investments in innovative products and services to better serve you.

Visit Benefits Canada at www.benefitscanada.com, a popular online venue that plan sponsors visit to learn about breaking industry news and trends. Now Sun Life Group Benefits can showcase some of its leading business solutions.

Only from Sun Life Financial

FastForward Claims Solutions, our health and dental claims processing technology is taking centre stage as one of the first featured topics on the microsite! Watch for our second advertisement about *FastForward* in the June 2010 issue of Benefits Canada and learn more about it by viewing the two videos found through our microsite. The site also features content about some of our benefits fraud management capabilities.

So much more - visit often

Over the next several months, please visit the microsite periodically as we continue to rotate and change content about new and updated products and services. This is information you can use to help keep you updated on innovations that affect your group plan.
