

North2South Benefits Solution

North2South Benefits Solution – a group benefits program for Canadian plan sponsors with operations in the U.S. and who have between 2 and 24 plan members living and working in the U.S.

Who benefits from this product?

North2South Benefits Solution is designed to give Canadian plan sponsors and their U.S.-based, full time plan members a simple, convenient solution that offers both sponsors and plan members the clarity and confidence they need in a U.S. benefits plan.

Our Partners

Sun Life has determined that the best fit for the provision of cross border medical benefits for our customers is Aetna Global Benefits (Aetna). Aetna will provide the U.S. core medical benefits. Aetna is one of North America's leading health care benefits companies – and it has a strong brand reputation in the U.S. The non-medical components of North2South Benefits Solution (i.e., dental, vision, STD, LTD, Life and AD&D) will be provided by Sun Life and Health Insurance Company (U.S.).

How does it work?

North2South Benefits Solution from Sun Life Financial is a comprehensive program built around four levels of core medical benefits. Plan sponsors choose the medical plan design that best fits their group needs. They can then round out their program by selecting from a range of dental, vision, short- and long-term disability plans and life and AD&D coverage. A major feature of this product is that no medical evidence from plan members is required for timely applicants.
