

Bill 28 Update: Pharmaceutical services

*****This Focus Update serves as an amendment to your contract wording. Please file this amendment notice with your Sun Life Financial contract for future reference. *****

As communicated in the December 3, 2015 [Focus Update](#), Sun Life now covers the eligible pharmaceutical services that are covered under the Québec drug insurance plan administered by RAMQ and applies its requirements.

We are making changes to your contract wording to reflect the eligibility of these new pharmaceutical services.

These changes are in response to the adoption of Bill 28 in the Province of Québec. Under this Bill, pharmacists in Québec have been able to offer additional services since June 20, 2015.

What do these changes mean for you?

Because your contract complies with RAMQ regulations, the following wording will be included in your contract to reflect the change.

Pharmaceutical services (rendered by pharmacists) - For employees residing in Québec, we will cover the pharmaceutical services that are covered under the Québec drug insurance plan and apply its requirements.

This new contract wording is effective as of June 20, 2015. Reimbursement of eligible claims will be paid retroactively to that date.
