

Sun Life *Pharma News* keeps you on top of trends and changes

Sun Life Pharma News is a tri-annual bulletin that shares the latest trends and changes to the pharmaceutical industry, as well as insights from the Sun Life Pharma team.

[This issue](#) of *Pharma News* focuses on cancer and breakthroughs in terms of treatments, and also takes a look at drugs recently added to Sun Life's prior authorization program and others in the pipeline. The opening editorial comes from JM Lavoie, Assistant Vice President, Product Development, and Atul Goela, Director, Pharmaceutical Benefits, and the educational corner is provided by Julie Blouin, our Senior Clinical Pharmacy Consultant who holds a Ph.D. in Pharmaeconomics. All three are part of the Product Development/Pharmaceutical Benefits team.

The next issue should be available early next year. In the meantime, you can read the previous issue of *Pharma News* on Cost Containment [here](#).
