

Updated group benefits forms coming soon

Over the next few months, plan sponsor and plan member group benefits forms will have a new appearance as they are converted into a new tool that provides a more functional and user friendly form.

While all content in the forms will remain the same, the forms will have the following enhanced features:

- Fillable fields within the PDF file
- Added validations to reduce input errors
- New look with one consistent font

Customized forms will be updated to this new standard when they are submitted for amendments; until then, they will remain the same.

You will be able to access the forms from their usual location.

TIP: Due to recent browser changes, the best way to open and utilize the PDF forms is to save them to your desktop and open them with Acrobat Reader from your desktop.
