

Provider Search is now available on mysunlife.ca

About Provider Search

Sun Life is making it even easier and more convenient for plan members to find a health care provider in their area. Already accessible to plan members on their mobile devices via the **my Sun Life Mobile App**, Provider Search is now also available from their desktop computers at mysunlife.ca (as of April 23, 2017).

Plan members can easily search for a wide-range of health care providers in their area including physiotherapists, chiropractors, massage therapists, psychologists, naturopaths, osteopaths, acupuncturists, podiatrists and chiropodists. They can also see the average rating each provider has received from other plan members, and there are over 90,000 providers to be found coast-to-coast.

Provider Search also lets plan members:

- Search via postal code or address from their computer
- See which providers bill Sun Life directly (if your plan allows for direct billing)

If plan members are looking for the right health care provider for them in their area – Provider Search is the perfect tool they can use to find those answers!

Sun Life is the only group benefits insurer in Canada to support this feature with ratings generated by plan members who have submitted a claim for that provider's services.
