

## Upcoming enhancements to Top DIN Listing report

A new feature will be added to the Top DIN (Drug Identification Number) Listing report to help you better manage your group benefits plan and the drug spend when considering drug cost containment products.

The report will allow you to view the drug type and the drug spend. The drug types will be listed as:

- Brand Name
- Generic
- Single Source

Three subtotal rows will be added to the bottom of the report, to allow you to see a summary of the drug spend by drug type.

This report is still available in PDF and Excel formats,
