

Sun Life Financial's Group Life & Disability launching a new partnership with the Fraud Risk Management team

Actively taking disability protection to the next level

Group Life & Disability (GL&D) is pleased to announce the implementation of a formal and collaborative program with Sun Life's Fraud Risk Management (FRM) team. The new process will further enhance our existing efforts to reduce the potential of fraudulent activity impacting disability claims.

By leveraging the expertise of the Sun Life FRM team in both fraud detection and investigation, GL&D will be able to leverage the practices and tools already established within the FRM team to establish a more robust disability fraud detection program. This means that GL&D will have more capability to improve identification and investigation of irregular or unusual claim patterns.
