

## NEW Innovative support for plan members on disability

Sun Life is partnering with Medical Confidence Inc. (MC) to help plan members on disability get the support they need from diagnosis to recovery.

For many plan members on disability, navigating the health care system and getting access to the treatment can be a long, frustrating experience. MC is a third-party service provider that helps facilitate specialist appointments, diagnostic tests, and procedures across Canada. While collaborating with treating family physicians, this optional service can help plan members on disability get treatment sooner, and ultimately help expedite their return to work .

This partnership with MC is part of our continued commitment to provide innovative and effective solutions to help our Clients live healthier lives.

Read more about this partnership in our [press release](#).
